

Custom Boxes Instructions:

1.) Measure envelope length (EL) & width (EW), then add 1/4" to each measurement.

2.) Determine height of box by stacking the cards & envelopes and measuring the height (H).

3.) Based on the above, this is the formula for the box bottom

$$EL + 1/4" + H + H = BL$$

$$EW + 1/4" + H + H = BW$$

Paper size: BL X BW

3.) Based on the bottom measurement above, this is the formula for the box top.

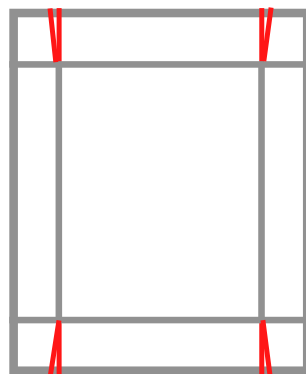

$$BL + 1/8" = TL$$

$$BW + 1/8" = TW$$

Paper size: TL X TW

4.) Score all sides of both papers using the height (H) measurement.

5.) Cut tabs on the short side of both papers.

6.) Fold all score lines and attach corners of the box top & bottom with liquid glue.
